### AUDITOR GENERAL'S REPORT

June 25, 2024

Mr. Monnie R. Captan Chief Executive Officer (CEO) Liberia Electricity Corporation (LEC) Water Side Monrovia, Liberia

### AUDITOR GENERAL'S REPORT ON THE FINANCIAL STATEMENT AUDIT OF THE LIBERIA **ELECTRICITY SECTOR STRENGTHENING & ACCESS PROJECT (LESSAP) FOR THE PERIOD ENDED DECEMBER 31, 2023**

### **Unqualified Opinion**

We have audited the financial statements of the Liberia Electricity Sector Strengthening Access Project (LESSSAP) for the period ended December 31, 2023. These financial statements comprise the Statement of Cash Receipts and Payments, Statement of Comparison of Budget and Actual Amounts for the period then ended, and a summary of significant accounting policies and other explanatory information.

In our opinion, the Financial Statements present fairly, in all material respects, the operations of the Liberia Electricity Sector Strengthening & Access Project (LESSSAP) for the period ended December 31, 2023, and its Statement of Cash Receipts and Payments, its Statement of Comparison of Budget and Actual Amounts and Explanatory Notes and Accounting Policies for the period then ended in accordance with International Public Sector Accounting Standards (IPSAS)

### **Basis of Opinion**

We conducted our audit in accordance with International Standards of Supreme Audit Institutions (ISSAIs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of Management in accordance with the ethical requirements that are relevant to our audit of the financial statements and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our adverse opinion.

### Management's Responsibility

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IPSAS Cash Basis, and for such internal control as Management determines is necessary to enable the preparation of these financial statements that are free from material misstatement, whether due to fraud or error. In preparing the financial statements, Management is responsible for assessing its ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless Management either intends to cease operations, or has no realistic alternative but to do so. The LESSAP Project Management is responsible for overseeing the Project's financial reporting process.

### **Auditor's Responsibility**

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

An audit in accordance with ISSAIs involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

> P. Garswa Jackson, Sr., FCCA, FCIP, CFC Auditor General, R.L.

Monrovia, Liberia June 2024

### STATEMENT OF RESPONSIBILITIES

The Financial Statements as set out on pages 11 to 19 have been prepared in accordance with the provisions of the Public Financial Management Act of 2009 amended 2019 and in compliance with International Financial Reporting Standards (IFRS) as promulgated by the International Accounting Standards Board (IASB) and adopted by the Government of Liberia.

In accordance with the provisions of the Public Financial Management (PFM) Act of 2009 amended 2019, I am responsible for the control of and accounting for public funds received, held, and expended for and on behalf of the Liberia Maritime Authority (LESSAP).

Under the provisions of the same Act, I am required to prepare unaudited final accounts of the LESSAP to be submitted to the Minister of Finance and Development Planning and the Auditor General (AG) two months after the end of the financial year to which it relates. However, I have delegated the preparation of the final accounts to the Chief Finance Officer for my transmittal to the Minister and the Auditor General as provided in the attendant Regulations of the Public Financial Management Act of 2009 amended 2019. Accordingly, I am pleased to submit the required Annual Final Accounts of the LESSAP in compliance with the PFM Act and its attendant Regulations. I have provided all the information and explanations as may be required in connection with the financial statements presented therein.

In preparing these Financial Statements, the most appropriate accounting policies have been consistently applied and supported by reasonable and prudent judgment and estimates. To the best of my knowledge and belief, these Financial Statements agree with the books of accounts, which have been properly kept.

I accept responsibility for the integrity of these financial statements, the financial information they contain and their compliance with the provisions of the Public Financial Management (PFM) Act of 2009 as amended and restated 2019.

Hon. Monie Captan

**Chief Executive Officer** 

Liberia Electricity Corporation (LEC)

June 27, 2024

Date

### **Executive Summary**

The Liberia Electricity Sector Strengthening and Access Project (LESSAP) is part of the government of Liberia medium-term development plan, as stated in the Pro-Poor Agenda for Prosperity and Development (PAPD) 2018-2023. Both the CPF (Country Partnership Framework) and PAPD identified the expansion of electricity services and its affordability for businesses, households, and public institutions as a necessary intervention to address constraints to economic growth, human capital development, and poverty reduction, made even more pertinent considering COVID-19. The project is consistent with the four pillars of the WBG COVID-19 Response Framework Approach Paper (saving lives; protecting poor and vulnerable people; enhancing sustainable business growth and job creation; and strengthening policies, institutions, and investments for rebuilding better).

The total project cost is estimated at US\$64.2 million. Cost estimates were prepared, reviewed, and adjusted in consultation with LEC, as well as the MME and were in line with similar projects in Sub-Saharan Africa.

### PROJECT OBJECTIVES

The development objective of the proposed project is aligned with PHRD's grant program development objective to "increase the delivery of off-grid electricity and other energy services in rural areas of fragile and conflict-affected states (FCS) in African Countries". The PHRD co-financing will support the electrification of health facilities in off-grid areas through stand-alone solar systems given the urgency to build resilience to epidemics like Ebola and COVID-19. The availability of the PHRD co-financing supplemented by grant support from Energy Sector Management Assistance Program (ESMAP) would enhance outcomes and impacts in rural areas while allowing the available IDA resources to focus on electrification of households in off-grid rural areas. Both the grants have been approved by the respective donors and the grant agreements were signed at the same time as the Financing Agreement subject to World Bank Board approval of the IDA financing package.

The Project is divided into Four components as follows with the restructured Components and Budget Reallocation: Component 1:Rehabilitation and Expansion of Electricity Infrastructure and Systems and Access Expansion (US\$31.20 million equivalent IDA). Component 2: Electrification of health centers and households in off-grid rural areas (US\$10.30 million). Component (3) Technical Assistance for Institutional reform, Capacity Building of Sector institutions, and Implementation Support to LEC (US\$14.50 million equivalent). and Component 4: Support to Sector Policy and Regulations ( US\$ 8.20 million equivalent).

### THE YEAR UNDER REVIEW

Name: Monie R. Captan

The Fiscal Year 2023 was considered a year of implementation of the overall objective of the project. The procurement processes for all major contracts under the project are progressing and some new contracts have been signed during the period. Overall, the implementation has been satisfactory.

\_ Date: June 27, 24 Name: Adam Sheriff Signature: Chief Finance Officer

Date: June 27,2024 Chief Executive Officer

### **NOTES TO THE FINANCIAL STATEMENTS**

I. Project Description and Cost Estimates
 The project comprises the following components.

### **Status of Implementation:**

The Project has three main components, and their status of implementation are as follows:

a. Component 1: Rehabilitation and Expansion of Electricity Infrastructure and Systems and Access Expansion (US\$31.2 million equivalent IDA) Subcomponent 1(a). Distribution Network Rehabilitation, Densification and Expansion (US\$18.70 million equivalent). This subcomponent will support the rehabilitation and expansion of the distribution network in communities under the grid or where the grid infrastructure is being constructed primarily in Monrovia and surrounding counties. For public facilities (health, educational, water treatment, etc.) and industries which are outside the existing grid network, dedicated feeders would be constructed to facilitate connection. The physical works would involve the installation of MV and LV poles (with footprints of ≤0.6m), MV/LV line materials (conductors/cables and accessories) and distribution transformers along existing public right-of-way (ROW) of roads, streets, and avenues reserved by the Ministry of Public Works for the use of utilities. The LV lines would be strung with insulated aerial bundled conductors (ABC) to reduce the line safety risks to the households. To enable the network to be resilient to worsening climate conditions (increasing rainstorm and flooding). Steel tubular poles would be used to construct the MV lines and both the MV and LV poles would be planted with 150 mm concentric concrete foundation cover below and 300 mm above ground. The subcomponent is subdivided into the following broad areas.

## b. Component 2: Electrification of Health Centers and Households in Off-grid Rural Areas (US\$5.1 million equivalent IDA, US\$2.7 million PHRD, US\$2.5 million ESMAP)

With the help of geospatial tools, the NES has identified the areas where off-grid options such as larger mini-grids, single-community smaller mini-grid, and stand-alone solar systems would be the least-cost electrification solution. A commercial approach for the distribution of SHS through private distribution companies is being supported under the on-going World Bank-financed LIRENAP Project (P149683) and other projects by development partners. However, progress has been slow given the typical affordability challenges of consumers in these communities. This component would support the design and implementation of pilots for reaching dispersed communities through stand-alone solar.

## c. Component 3: Technical Assistance for Institutional Reform, Capacity Building of Sector Institutions, and Implementation Support to LEC (US\$14.5 million equivalent)

The component would support an extension of the current MSC and a transition from the MSC to a full-time sustainable management including training and capacity building of LEC. The extension of the MSC is to ensure the normal operation of LEC and the smooth transition. A monitoring consultant will be recruited under the component to support the LEC Board in monitoring the performance of the MSC. The component will also support the MME to establish a sustainable energy department to enable it to effectively carry out sector planning and overall oversight including M&E activities. Finally, it would

complement the support by other development partners to the newly established Liberia Electricity Regulatory Commission (LERC) to prepare the required regulatory and monitoring instruments and capacity building activities for its technical staff, in order to ensure that energy assets are protected against potential disruptions due to climate hazard and capacity building activities.

### d. Component 4: Emergency Sustainable Generation Support (US\$8.20 million equivalent)

The component would support repair of Unit 1 of Mount Coffee Hydropower Plant and generation spare parts, Technical and capacity building for sustainable operation of power plant and Repair and maintenance of the Bushrod Power Plant.

### Other Information:

### i. Significant Accounting Policies

These financial statements have been prepared in accordance with the International Public Sector Accounting Standards ("IPSAS"): Financial Reporting under the Cash Basis of Accounting. The financial statements fully comply with Part 1 of this standard, which is mandatory, and includes certain optional disclosures considered helpful to the readers of the financial statements. The accounting policies set out below have been applied consistently throughout the period. This implies that all expenditures are expended whether they are revenue or capital in nature and income is recognized when funds are received from the Word Bank.

### ii. Reporting Period

Reporting date is the date of the last day of the reporting period to which the financial statements relate. The reporting date of the financial statements is December 31, 2023 for the fiscal period January 1 – December 2023.

Conversely, the prior period reporting date of December 31, 2022 was for the fiscal period July 1, 2021 - December 31, 2022. This was due to a change in the Government of Liberia's fiscal period from July - June to January - December, thus leading to a special fiscal period of July 1 - December 31, 2021 which gave reporting entities the options of preparing six and twelve (6 and 12) months financial statements or an eighteen (18) month financial statements.

Consequently, the amounts shown for the current reporting period and the comparative amounts are not comparable.

### iii. Currency

The financial statements have been presented in United States Dollars, the reporting currency of the executing agency, the Liberia Electricity Corporation. Transactions in foreign currencies are translated and recorded in United States Dollars at the prevailing rate on the date of the transaction. The project book of accounts and special account at Ecobank are maintained in United States Dollars

### iv. Banking Information

The project account is domiciled at Ecobank Liberia Ltd with account titled: Energy Sector Strengthening Access Project, with account number 6101765372

There is an adjustment of US\$1,000 for petty cash that was ommitted for Petty Cash at the end of 2022 Financial Year.

A refund of US\$4,000 for accomodation, DSA and Air Fare paid to George L. Gontor of MME was deposited into the project Account, since the attendance of the 58th Session of United Nations Framework Convention never materialised due to the non-issuance of travel visa. activity did not take place as scheduled.

Note 5: Accumulated Project Expenditure
Accumulated Project Expenditure for the period is as follows:

Accumulated Project Expenditure	20,666,932	1,282,485	21,949,417	10,480,113
Component 4: Emergency Sustainable Generation		(: <b>*</b> :		1.00
