**Financial Statements Audit of the Cote D'Ivoire Liberia Sierra Leone -Rural Electrification (CLSG-RE) Project for the Fiscal Year Ended December 31, 2025**

**Qualified Opinion**

We have audited the financial statements of the Cote D'Ivoire Liberia Sierra Leone -Rural Electrification (CLSG-RE) Project for the fiscal year ended 31<sup>st</sup> December 31, 2025, which comprise the Statement of Cash Receipts and Payments, and the Statement of Comparison of Budget and Actual Amounts and a summary of significant accounting policies and other explanatory information.

In our opinion, except for the possible effects of the matter described in the Basis for Qualified Opinion paragraphs below, the CLSG-RE financial statements present fairly the Statement of Cash Receipts and Payment as at 31<sup>st</sup> December 2025, and its Statement of Comparison of Budget and Actual Amounts and summary of significant accounting policies and other explanatory information for the year then ended in accordance with International Public Sector Accounting Standards (IPSAS 2017 revised) Cash Basis of Accounting.

**Basis for Qualified Opinion**

During our audit of the financial statements of the Cote D'Ivoire Liberia Sierra Leone -Rural Electrification (CLSG-RE) for the year ended December 31, 2025, we identified certain transactions that materially misstate the financial statements:

- Total expenditures were overstated by US\$1,000.00 thereby understating the project closing cash balance by the same amount.
- Management did not provide adequate supporting documents for expenditures amounting to US\$60,357.00 posted to the project management cost account which raises concerns about the validity and accuracy of the transactions.

These issues are material but not pervasive to the financial statements as a whole.

We conducted our audit in accordance with International Standards of Supreme Audit Institutions (ISSAIs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of Cote D'Ivoire Liberia Sierra Leone-Rural Electrification (CLSG-RE) Project in accordance with the ethical requirements that are relevant to our audit of the financial statements in Liberia, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### **Management's Responsibilities**

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IPSAS Cash Basis, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error. In preparing the financial statements, management is responsible for assessing its ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to cease operations, or has no realistic alternative but to do so. The CLSG-RE is responsible for overseeing the Entity's financial reporting process.

### **Auditor's Responsibilities**

Our responsibility is to express an opinion on the Financial Statements based on our audit. We conducted our audit in accordance with International Standards of Supreme Audit Institutions (ISSAI) and World Bank Guidelines. Those standards and the applicable guidelines required that we comply with the ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depends on the auditor's judgment, including the assessments, the auditor considers internal controls relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of evaluating the appropriateness of accounting policies used and the reasonableness of the accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

## Unaudited Financial Statements for the Year Ended December 31, 2025

### Executive Summary:

The Republic of Cote d'Ivoire, the Republic of Liberia, the Republic of Sierra Leone, and the Republic of Guinea jointly entered a treaty for the construction of the CLSG interconnection electric power line. The CLSG Liberia component Loan Agreement was signed on November 26, 2013, between the Republic of Liberia and the African Development Fund. The Fund agreed to lend the Republic of Liberia amount not exceeding the equivalent of Twenty-Four Million Nine Hundred and Forty Thousand Units of Accounts (UA 24,940,000). The project, with the objective to facilitate sustainable energy trade between the participating countries and help establish dynamic electric power market in the sub-region, involves the construction of a high voltage interconnection network linking Cote d'Ivoire, Liberia, Sierra Leone, and Guinea. The project aims at electrifying communities situated along the power line, building the capacities of the project executing agencies, and conducting feasibility studies for hydroelectric power stations.

During the year ended December 31, 2025, Liberia Electricity Corporation as executing agency for the African Development Bank project-CLSG-RE received disbursement of **US\$515,947** (US\$455,590 in the Special Account & US\$60,357 reimbursement for operating cost) and **US\$1,152,884** as **Third-Party payments** directly transferred from the donors to suppliers for works and services. The cumulative disbursements to the special projects account from inception to date summed up to **US\$2,387,894**. The Cumulative Third-Party payments for works, goods and services as of December 31, 2025, are **US\$17,903,782**. Fund controlled by the Project Implementation Unit was received from the African Development Funds (ADF) into its special account maintained at the Central Bank of Liberia. Third Party payments were transferred from both the African Development Funds (ADF) and the Transition Support Facility (TSF) to suppliers (contractors) for works, goods, and services that benefit the Liberia Electricity Corporation. The Special Accounts funds are generally expended on operating activities as part of the implementation of the Project and accounted for along with disclosure notes for Third-Party payments in this report.

The Financial Statements of the CLSG-RE project are prepared in accordance with International Public Sector Accounting Standards (IPSAS) Cash Basis and the African Development Guidelines. The financial statements presented herein include the Statement of Cash Receipts and Payments, the Statement of Comparison of Budget and Actual Funds, Statement of Cash Balances and Fund Balances, and Notes to the Financial Statements covering the period January 1, 2025, to December 31, 2025. The Project Progress Report and other reports as necessary are prepared and presented separately.

## Notes to the Financial Statements

### Overview of the Project

To address constraints facing the Electricity sub-sectors within the ECOWAS region, member states have collectively decided to harmonize their energy policies based on the Energy protocol defining the legal framework for regional cooperation on energy. In this context in the West African Power Pool (WAPP) was established as an ECOWAS cooperation Mechanisms for pooling resources with the view of integrating the operation of the national electricity power grids of member states into a unified regional market. The Cote d'Ivoire, Liberia, Sierra Leone and Guinea (CLSG) redevelopment was established as one of the sub-programs under WAPP's five (5) priority projects.

The Government of Liberia also adopted a National Energy Policy (NEP) in 2009 as a single project under the aegis of the WAPP Secretariat and through the WAPP joint implementation committee as establish by the four governments. The four National Electricity Companies for each CLSG member country were selected as the executing agency for the Rural Electrification Component.

On November 26, 2013, the AFDB agreed with the Government of Liberia to finance CLSG-RE component of Liberia under the WAPP rural electrification program. The financing agreement became effective in xxx after the Government of Liberia certified the conditions for effectiveness and entry in force of the financing agreement. The first disbursement was made in July 2016.

The project appraisal calls for a three - year period from January 2016 to December 2019, however due to unforeseen delays and bureaucracies from both the funders and the GOL the project began in the last quarter of 2017. It should also be noted that there have been about three (3) successive changes of administration at LEC between December 2016 (when the management contract between GOL and Manitoba Hydro ended) and January 2018. These changes, coupled with the overall transition at the national level, have impacted on the project schedule. In 2024, the PIU received a no objection notice from the African Development Bank for an extension of the project implementation schedule up until December 31, 2025.

The project Implementation Unit (PIU) of the Liberia Electricity Corporation has been given the responsibility of implementing the project. The PIU is headed by a project coordinator who reports to the overall LEC project and planning manager and the African Development Bank. In conjunction with the project coordinator, the PIU has other LEC's staff dedicated to the project as follows; a Sr. Electrical Engineer, a Project Engineer (Civil), a Procurement officer, an Administrative and Finance officer, a Project Accountant, an Environmental Officers, and two drivers. Furthermore, the project structure includes supervision engineers and site engineers. The PIU manages the project scope, schedule and budget as furnished by the project appraisal and approved by the AFDB.

## Notes to the Financial Statements - continued

The PIU has developed and adopted administrative and financial protocols for the project operation which include a Project Implementation Manual (PIM). The project operational and financial management procedures are set out in the Project Implementation Manual (PIM)

### Project Objective

The project aims at electrifying communities situated along the power line, building the capacities of the project executing agencies, and conducting feasibility studies for hydroelectric power stations. Public institutions such as health centers within communities along the power line will also be supplied with power.

### Project Cost Categories

The project is structured across five primary expenditure categories, each contributing to the effective implementation and management of project activities:

1. **Services/Consultancies** This category covers the deployment of specialized human resources essential to project execution. It includes technical experts such as Environmental and social safeguard specialists, assurance services, project resettlement action plan activities, Procurement Specialists, and Financial Management professionals engaged across various implementation levels.
2. **Works** This comprises the construction-related activities under the project, including the installation of transmission lines, construction of substations, development of distribution networks (including customer connection services), and the implementation of energy-efficient public lighting systems.
3. **Training** This category supports capacity-building initiatives targeting technical personnel and administrative staff involved in project execution, particularly those within implementing agencies. Training programs are aimed at enhancing technical competencies and sector knowledge.
4. **Goods** This involves the procurement of materials and equipment necessary for project delivery. Items procured under this category include vehicles (e.g., SUVs and motorcycles), transformers, customer connection equipment, and office assets such as laptops and IT accessories.
5. **Operating Costs/Project Management** This covers the day-to-day administrative and operational expenses of the Project Implementation Unit (PIU). Expenditures include, but are not limited to, fuel, vehicle maintenance, communications, bank charges, Salaries of project contracted personnel and stipends for LEC seconded staff.

## Significant Accounting Policies

### Basis of Presentation

The financial statements are prepared in accordance with the International Public Sector Accounting Standards (IPSAS) Modified Cash Basis and in the manner required by the Loan agreements and the African Development Bank's Policies and Procedures. This implies that all expenditures are expensed whether they are revenue or capital in nature and income is recognized when funds are received from the African Development Fund.

### Currency

The Financial statements have been presented in United States Dollars, the reporting currency of the executing agency, the Liberia Electricity Corporation. Transactions in foreign currencies are translated and recorded in United States dollars at the prevailing rate on the date of the transaction. The project book of accounts and its special accounts at CBL are maintained in United States Dollars.

### Banking Information

The project account is domiciled at the Central Bank of Liberia with account titled: CLSG Liberia Rural Elect. ADF Loan with account number 1502023692.

## Notes to the Financial Statements - continued

### Note 1: Outstanding Commitment

As of December 31, 2025, outstanding commitment balances represent contractual obligations that have not yet been settled within the accounting period. These amounts will only be settled when the contracted goods, services, or works are delivered, certified, and invoiced in accordance with the contractual provisions. At the reporting date, commitments that do not meet the settlement conditions or have met the conditions but are not yet settled are disclosed and accounted for as financial obligations to be settled in subsequent periods.

On December 31, 2025, the CLSG-RE Project had outstanding commitments totaling **US\$2,329,468.99** related to signed contracts for infrastructure works, engineering and consultancy services, and pending reimbursement of expenses (**US\$76,328.40**) to the Liberia Electricity Corporation. These commitments are expected to be settled within the next financial year. While not required, this disclosure aligns with the encouraged disclosures in Part 2 of the Cash Basis IPSAS and supports good public financial management practices. The schedule of outstanding commitments presented below provides additional information.

| Commitment Schedule |                                 |                      |                      |                        |

### Note 3: Third-Party Payments

During the reporting period, certain payments for goods, works, and services were made directly by development partners to third-party suppliers on behalf of the project. These payments did not pass through the entity's bank accounts but are considered part of the total project disbursements. The total value of third-party payments recognized during the year ended December 31, 2025, amounted to **US\$1,152,844**. Cumulatively, third-party payments from project inception to December 31, 2025, totaled **US\$17,903,782**. These payments were made by the African Development Fund (ADF) and the Transition Support Facility (TSF) to contractors and vendors for eligible project expenditures. The goods and services procured through these payments directly benefited the Liberia Electricity Corporation under the CLSG-RE Project. Although these funds were not received into the Special Account, they are disclosed in accordance with IPSAS guidance to provide a complete picture of project financing and expenditure. Details of the third-party payments for the reporting period are presented in the table below:

## APPENDICES

These Appendices contain additional tables and notes explaining figures presented in the financial statements elsewhere in this report.

### Appendix A1: Explanation for Budget Variances (CLSG-RE)

| Explanation for Budget Variance (FY2025) |                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| A-                                       | The unfavorable variance between budgeted loan proceeds and actual receipts is due to the timing of final installation and retention payments. These amounts are contractually payable only after project completion (December 31, 2025). Although already committed to project activities, the funds were not received within the reporting period and will be disbursed through third-party payments during the grace period.   |
| B-                                       | The variance is attributable to the reimbursement of operating costs (salaries to Project staff) transfer directly by the bank to LEC.                                                                                                                                                                                                                                                                                            |
| C-                                       | The favorable variance is primarily due to delays in the procurement and finalization of service contracts under the project. As some contracts were concluded later than anticipated, the PIU incurred lower-than-expected expenditure during the audit period.                                                                                                                                                                  |
| D-                                       | The favorable variance in works expenditure reflects a timing difference for funds disbursement. The difference highlights portions of the budgeted works payments that relate to final installation and retention amounts, payable only upon project completion. As such, these payments were budgeted for 2025 but will be executed during the grace period. This explains the lower actual expenditure compared to the budget. |
| E-                                       | The favorable variance primarily relates to project operating cost budgeted but not paid from project's designated account. The cost was underwritten by the Liberia Electricity Corporation for which reimbursement from the African Development Bank is being processed.                                                                                                                                                        |

| /iv: List of justification previously submitted to the Bank with request No. and amount.                                                                                                                     |                  |                                        |
| /v: The discrepancy should be explained in a separate note, e.g., expenses rejected by the Bank, non-eligible expenses to be reimbursed to SA, expenses not yet justified to the Bank, interest earned, etc. |                  |                                        |

#### Appendix A5: Other Information: CLSG-RE Project Implementation Status

**MV/LV Distribution Network** – the scope of the project was to construct distribution networks in communities within three kilometers of the 225kV CLSG interconnection transmission lines. These lines span several counties and many rural communities, many of which had never experienced grid electricity. By the completion of the project, the distribution networks were constructed in at least one hundred forty-four rural communities, with easy potential for future expansion. Out of these 144 communities, over one hundred twenty-one communities had both the medium voltage and low voltage networks. Due to the lack of a significant population in the remaining communities, only the medium voltage network was constructed in them.

Despite the numerous challenges, the project successfully constructed over five hundred sixty-seven route kilometers of distribution network (MV&LV) across the four counties.

**Customer Connections/households** – the project connected at least twenty thousand five hundred fifteen (20,515) customers across the four counties, of which 20,350 were single-phase meter installations, while 165 were three-phase meter installations. These connections have assisted in increasing the national electricity access. With an average household size of 4.4 persons per household (source: 2022 national census report), it can be estimated that over ninety thousand persons were connected under the project.
